

2nd BIODYNAMIC AGRI-CULTURAL TRAINING COURSE

**İstafıl Biyodinamik Organik Tarım Çiftliği Caltaca-Ihsaniye
Köyü/İstanbul**

From Friday, November 8th - 7pm
To Sunday, November 10th - 1pm

**FREE INTERNATIONAL WANDERING SCHOOL - FIWS
For Biodynamic Agri-Culture**

INVITATION

This deepening workshop is aimed for people from the Biodynamic Movement in Turkey and other countries. Our target group are people who practically run farms themselves or work there, but especially also for people who are active in advising and accompanying biodynamic and DEMETER farms. But also for people who work in controlling institutes and therefore also inspect DEMETER farms.

It will be hold in English language and translated in Turkish.

The main topic will be the work on the 2nd lecture of Rudolf Steiner's Agricultural Course. The aim of this work is to promote and develop the spiritual foundations for understanding biodynamic agriculture as a whole.

We do not only want to do this work theoretically, but at the same time we also want to do practical observation exercises in nature. These deepening courses build on each other, but it should not be a condition that you have been there from the beginning in order to be able to participate. There is always the possibility to get fully involved in the ongoing learning and experience process.

Best regards,

Arzu Duran

Hans Supenkämper
